Notes to the financial statements

as at 30th June 2012

Note 1 - Significant Accounting policies

a) Presentation of the financial statements

The financial statements of the Fund are established in accordance with the Luxembourg legal and regulatory requirements concerning undertakings for collective investment.

The financial statements were drawn up on basis of the net asset value of 29th June 2012 using the last available prices on 29th June 2012.

b) Valuation

- 1) Securities listed on Regulated Markets, which operate regularly and are recognised and open to the public, are valued at the last available price; in the event that there should be several such markets, on the basis of the last available price of the main market for the relevant security. Should the last available price for a given security not truly reflect its fair market value, then that security is valued on the basis of the probable sales price which the Directors deem it is prudent to assume;
- 2) Securities not listed on Regulated Markets, which operate regularly and are recognised and open to the public, are valued on the basis of their last available price. Should the last available price for a given security not truly reflect its fair market value, then that security is valued by the Directors on the basis of the probable sales price which the Directors deem it is prudent to assume;
- 3) Swaps are valued at their fair value based on the underlying securities (at close of business or intraday) as well as on the characteristics of the underlying commitments;
- 4) The liquidating value of futures, forward and options contracts (or any other derivative instruments) not traded on Regulated Markets or stock exchanges means their net liquidating value determined, pursuant to the policies established in good faith by the Central Administration Agent, on a basis consistently applied for each different variety of contracts. The liquidating value of futures, forward and options contracts (or any other derivative instruments) traded on Regulated Markets or stock exchanges are based upon the last available settlement prices of these contracts on Regulated Markets or stock exchanges on which the particular futures, forward or options contracts (or any other derivative instruments) are traded by the Fund; provided that if a futures, forward or options contract (or any other derivative instruments) could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract is such value as the Central Administration Agent may deem fair and reasonable.
- 5) Shares or units in underlying open-ended investment funds are valued at their last available price;
- 6) Liquid assets and money market instruments are valued at nominal value plus any accrued interest or on an amortised cost basis. All other assets, where practice allows, are valued in the same manner. Short-term investments that have a remaining maturity of one year or less are valued (i) at market value, or (ii) where market value is not available or not representative, at amortised cost.

c) Net realised gain/ (loss) on sales of securities

The net realised gain/ (loss) on sales of securities is determined on the basis of the average cost of securities sold.

Notes to the financial statements (continued)

Note 5 - Performance fee

The Investment Manager is entitled to receive, from the net assets of certain Classes of Shares, a performance based incentive fee (the "Performance Fee").

The first Calculation Period commences on the Valuation Day immediately following the close of the Initial Offer Period. The Performance Fee is calculated, accrued and crystallised on each Valuation Day as an expense of the relevant Class of Shares, meaning that each time a Performance Fee is accrued, it becomes a payable to the Investment Manager. The Performance Fee is paid to the Investment Manager monthly in arrears.

- For the Sub-Fund NORRON SICAV - Preserve:

If on any Valuation Day, the Gross Asset Value ("GAV") per Share, which is the Net Asset Value per Share after accrual of all fees but before the accrual of Performance Fee, is greater than the High Watermark ("the HWM"), a Performance Fee is calculated by multiplying the difference between the GAV per Share and the HWM by the last outstanding number of Shares of the relevant Class of Shares.

The HWM is the highest of the Net Asset Value of the relevant Class of Shares of the previous Valuation Day and the Index Value of the previous Valuation Day multiplied by the daily performance of the Index. The Index Value is the Index converted into the base value of the relevant Class of Shares at the date of the launch of the Class of Shares. If the launch price is 100, Index Value is the index to the base of 100.

- For the Sub-Fund NORRON SICAV - Target and NORRON SICAV - Select:

If on any Valuation Day, the Gross Asset Value ("GAV") per Share, which is the Net Asset Value per Share after accrual of all fees but before the accrual of Performance Fee, is greater than the HWM, a Performance Fee is calculated by multiplying the difference between the GAV per Share and the HWM by the last outstanding number of Shares of the relevant Class of Shares.

The HWM is the highest of the Net Asset Value of the previous Valuation Day of the relevant Class of Shares or the Net Asset Value of the previous Valuation Day for which a Performance Fee was crystallised.

- For the Sub-Fund NORRON SICAV - Active:

A Performance Fee is only accrued when the Gross Asset Value ("GAV") is greater than the Base GAV. The Performance Fee is equal to the difference between the GAV and the Base GAV multiplied by the applicable Performance Fee Rate as outlined in the table below.

The Index Value is the difference of performance between the GAV and the Index, converted to the base value of the relevant Class of Shares at the date of launch of the Class of Shares, on the relevant Valuation Day expressed as a percentage.

The Hurdle Value is the maximum observed Index Value.

The Marginal Performance Rate is the GAV of the previous Valuation Day adjusted by the difference between the Index Value and the Hurdle Value.

The Base GAV is the current GAV adjusted by the Marginal Performance Rate.
