## MONTHLY REPORT – PRESERVE

Nov 2017

### Fund Manager's comment

The Swedish real estate market was still a hot topic, both in the press and in the markets. Real estate bonds continue to be offered in the market. The Swedish krona vs the euro depreciated in November, which could be a combination of the Riksbank's statements and the weakness of the Swedish real estate market. Spreads in general were stable to wider, especially euro HY markets where the spreads were 20bp wider in the month. It has been a strong year, hence the yields are low and spreads tight on absolute level still. The flow in the mutual funds in the Nordic market is marginal negative. As a consequence, the market is more offered and local new issues are harder to place. The liquidity in the market has not improved. If this is a year-end effect remains to be seen. In general, we are cutting our low exposure to the Swedish real estate market even more and are reducing illiquid bonds in our portfolios.

The fund is unchanged in November. The fund has invested in commercial papers with short duration which now makes up more than 10 percent of the fund. The fund is keeping shorter credit/interest rate duration than normal due to valuation in the market.
